25X1

1. Plant No. 2 of the K. Y. Voroshilov Works at Dubnica nad Vahom (P 49/T 69) was built in 1938 and is situated in the woods and mainly underground. The boiler room, which is on the surface, was damaged by bombing during World War II and has not yet been repaired. No other war damage was suffered by the plant.
2. Plant No. 2 occupies an area of 2,000 square meters and is located about 1 kilometer southeast of Plant No. 1, the main Voroshilov plant. The wire fence around Plant No. 2 is damaged in several places. There is one entrance for workers and one for the railroad track.
3. The plant employs 3,000 people, 60% of whom are women. Work is done in three eight-hour shifts.
4. This plant fills bombs, mines, and grenades and also assembles aircraft and tank engines. All products are sent by rail to Plant No. 1, where they are checked and transported further. Ammunition is stored at Plant No. 3.
5. The entire plant has neon lights. Power is provided by the hydroelectric plant about two kilometers away.
6. The main gate is guarded by a militia member. Guards are changed every eight hours. The railroad entrance to the plant is not guarded. The SNB station is 200 meters from the plant; all civilians' documents are checked there. The plant area as a whole is guarded by two military sentries who are on duty for four hours at a time.
7. Most of the departments in Plant No. 2 are secret.
